Flask Application Development:

Healthcare Appointment Management Platform:

The screenshot shows a web browser at 127.0.0.1:5000 displaying the 'Healthcare Appointment Management Platform'. The dashboard has a blue header with the title and subtitle 'DevOps Capstone Project using Flask, GitHub Actions & Trello'. Below the header, there are three white cards with green status buttons: 'Health Check API' (Service Healthy), 'Appointment Status API' (Appointment Confirmed), and 'Doctor Availability API' (Doctor Available). Each card includes a brief description of its function. At the bottom, a section titled 'Available API Endpoints' contains a table with three columns: API Endpoint, Description, and Status.

API Endpoint	Description	Status
/health	Appointment Service Health Check	Active
/appointment-status	Patient Appointment Validation	Active
/doctor-availability	Doctor Availability Tracking	Active

Health:

The screenshot shows a web browser at 127.0.0.1:5000/health. The page displays a white card with the text 'Appointment Service Health' in blue and 'Healthy' in green, indicating the service is operational.
