

Apache Airflow Exercise — Daily Attendance Processor

- By Santhosh Kumar

OUTPUT:

```
root@ubuntu:~$ docker exec -it airflow bash
airflow@f2075bb7f6ba:/opt/airflow$ cat /tmp/attendance.txt
Aarav,Present
Priya,Present
Rahul,Absent
Sneha,Present
Kiran,Absent
Ananya,Present
Vikram,Present
Meera,Absent
Farhan,Present
Divya,Present
airflow@f2075bb7f6ba:/opt/airflow$ cat /tmp/attendance_report.txt
Daily Attendance Report
Total Students = 10
Present Students = 7
Absent Students = 3
Attendance Percentage = 70%
Status = Needs Improvement
airflow@f2075bb7f6ba:/opt/airflow$
```

```
Absent Students List
Rahul
Kiran
Meera
```

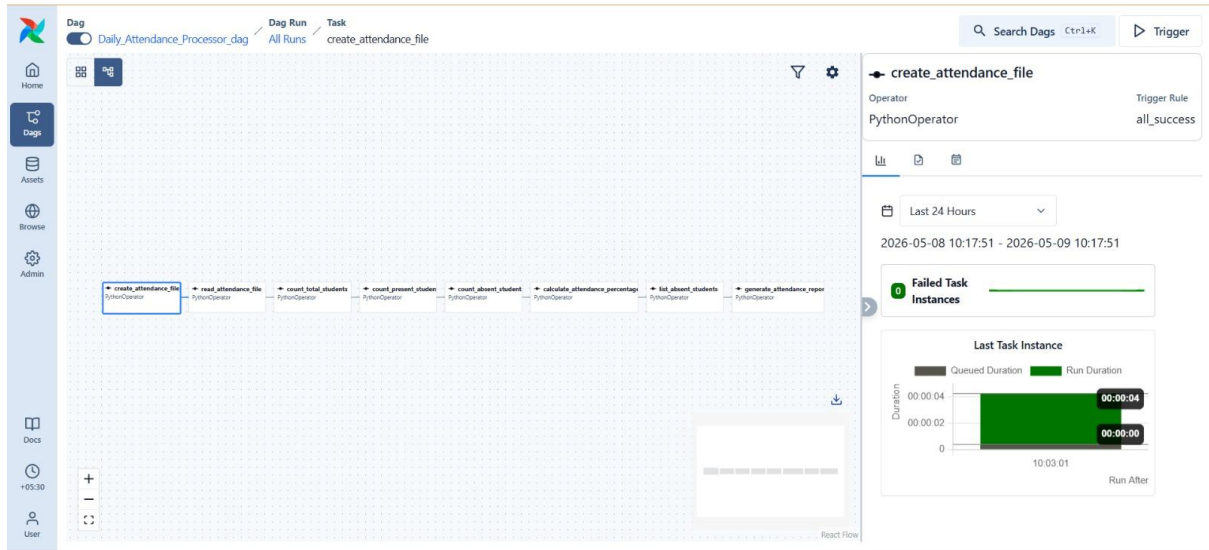

The screenshot displays the Apache Airflow web interface. The 'Dags' tab is selected, showing a list of DAGs. The interface includes a sidebar with navigation links (Home, Dags, Assets, Browse, Admin, Docs, User) and a top navigation bar with tabs for Dags, Dag Runs, and Task Instances. A search bar and various filters (All, Failed, Queued, Running, Success, Required Actions, Active, Paused) are also visible. Two DAGs are listed: 'Daily_Attendance_Processor_dag' and 'Employee_Salary_Processing_dag'. Both show a 'Latest Run' status of 'Success' with a green checkmark. The interface also includes a 'Filter by tag' dropdown and a 'Sort by Display Name (A-Z)' dropdown.

DAG Name	Latest Run	Next Run
Daily_Attendance_Processor_dag	2026-05-09 10:03:01 Success	
Employee_Salary_Processing_dag	2026-05-09 09:47:45 Success
